This project is implemented through the CENTRAL EUROPE
Programme co-financed by the ERDF

The “Via Regia” provides access to the important European economic region between Erfurt, Dresden, Berlin, Wrocław, Kraków and Lviv with more than 37 million inhabitants. To use the high potential of growth efficient infrastructures are needed as well as joint strategies. This is the starting point of Via Regia Plus, a joint initiative of fourteen cities and regions from Poland, Germany, Slovakia and the Ukraine.

During the mid-term conference the first results of the project in the fields of regional governance and the cooperation of metropolitan regions will be presented. You are kindly invited to discuss how the cities and regions may strengthen their functions as “motors” of growth and innovation.

More information about the event, the project Via Regia Plus and the further activities is available at www.viaregiaplus.eu.

Program

Moderation: Robert Burdy,
