This project aims at modernising the road leading to the Krompach-Jonsdorf border crossing. This border crossing has not been opened to traffic mainly because of the poor road condition on Czech territory.

Within the scope of project the road on the Czech territory will be upgraded on a 4,580 m section in Heřmanice-Krompach which according to the documentation begins at the intersection of route III/27016 (Heřmanice) and ends at the intersection with route III/27016 (Krompach).

The modernisation of the roadway includes the thickening of the bitumen layers with the total thickening treatment averaging about 70 mm. On the German side of the border an alternative carriageway will be provided for motor-cars.
